

High quality observations, increased awareness

/ METEOROLOGICAL SOLUTIONS WORLDWIDE

VAISALA

Worldwide reach

When you are looking for a global innovator, leading supplier of meteorological and hydrological instrumentation or need services for your weather systems, you have several reasons to choose Vaisala. We are ready to fulfill your needs no matter where you are.

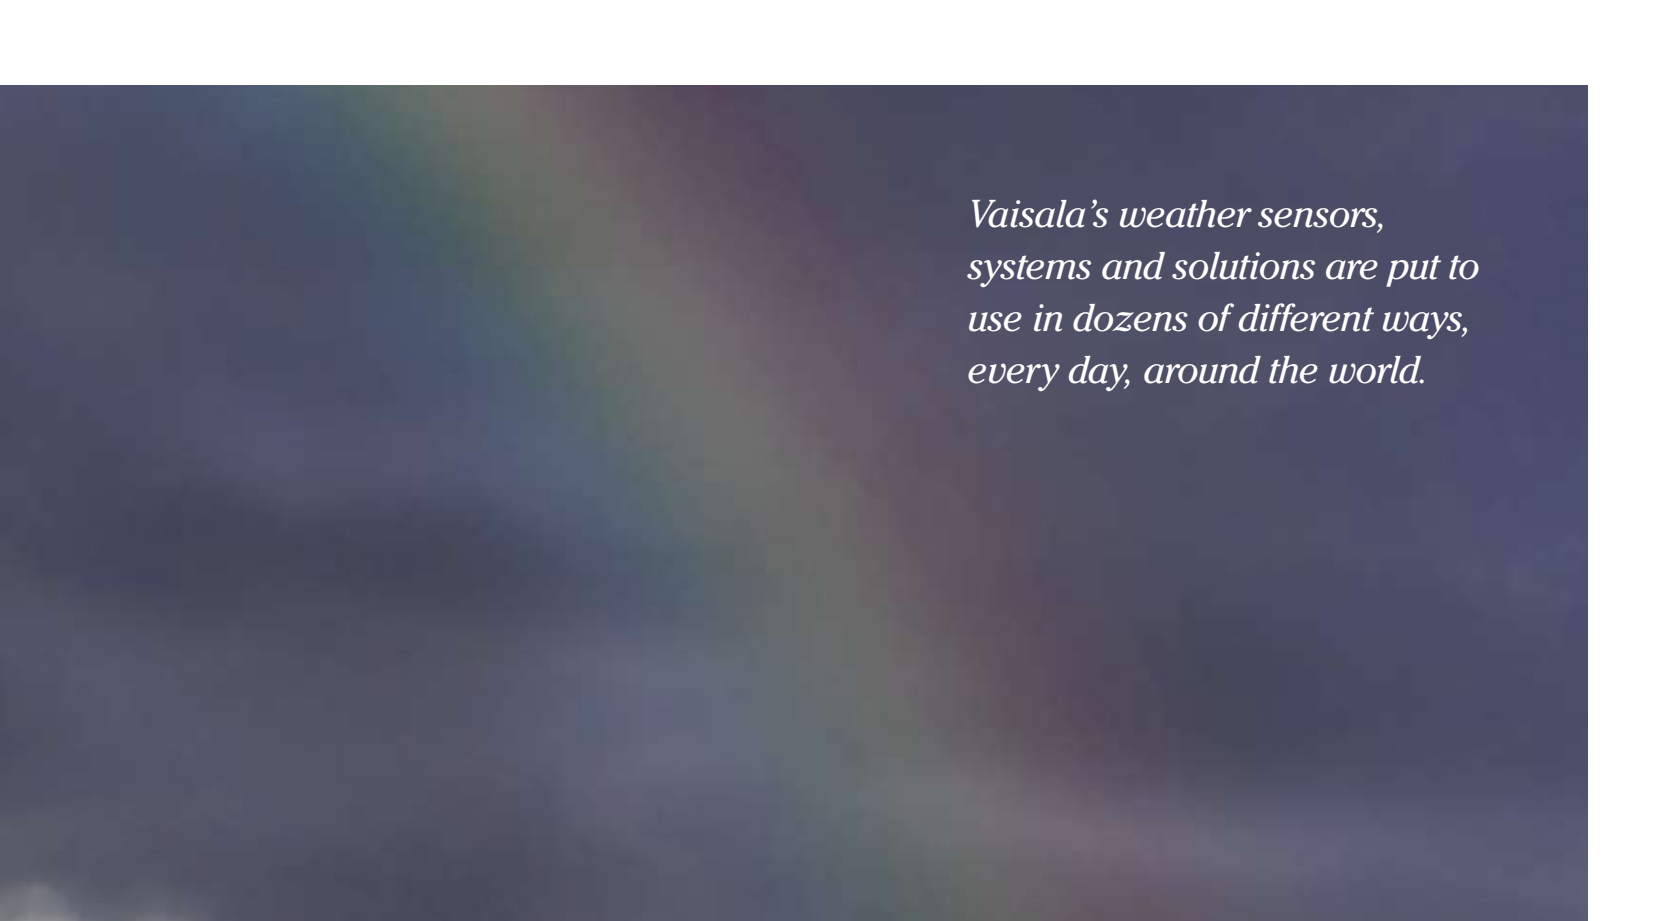

We like to think that our solutions improve lives: with better foreknowledge of weather and hydrological events, we increase safety and efficiency on land, sea and in the air.

Vaisala instruments are a staple of the worldwide meteorological community because they last for decades. Many Vaisala solutions are modular and upgradeable, so systems can be expanded and enhanced as necessary, saving you money. We also guarantee the availability of replacement parts for the product life cycle and beyond.

A thousand applications

Vaisala meteorological equipment is in use every day, around the world. Our solutions support a wide variety of applications, including:

- Agricultural applications
 - Air quality monitoring and forecasting
 - Aviation, traffic, marine and other transportation applications
 - Climatology
 - Defense applications
 - Disaster risk reduction
 - Hydrological monitoring and forecasting
 - Numerical weather prediction
 - Observation networks and present weather monitoring
- 

*Vaisala's weather sensors,
systems and solutions are put to
use in dozens of different ways,
every day, around the world.*

Your life cycle partner

You need more than instruments – you need a partner that you can rely on for planning, installation and ongoing service. These are some of Vaisala's core strengths – and one reason why some of our customer relationships have lasted more than 50 years.

Vaisala offering includes:

- Automatic weather stations
- Sounding systems
- Weather radars
- Lightning detection systems
- Wind profilers
- Visibility and present weather measurements
- Cloud height measurement
- Data management systems
- Project services
- Operation support services
- Data services
