

Vaisala SiteConnect™

Keep your system up and running

Vaisala SiteConnect™ lets you concentrate on using your observation system and facilitates the supervision of your network performance. Through our comprehensive range of services we can pro-actively maintain and support your system, with minimum action on your part.

Vaisala remote monitoring center works 24/7 to ensure maximal up-time – it is almost like having an expert always on site. Alarms and notifications are processed instantly and corrective actions are started and managed according to the service agreement. Some corrective actions can already be done remotely.

Vaisala SiteConnect™ monitors and collects also your system performance data for future analysis. This enables planning for even more increased efficiency of your operations.

Vaisala SiteConnect™ provides the maintenance team with ability to monitor Vaisala systems remotely and initiate immediate corrective maintenance actions..

Vaisala's offering

- 24/7 remote monitoring for your observation systems
- Automated system alarms in critical failures
- Secured remote connections
- Performance reports of the observation system

Customer benefits

- Lower maintenance costs through remote actions
- Follow up of system performance
- High uptime
- Rapid service response

Customer requirements

- Internet connection
- Activated only through a service agreement

Service extensions to meet your needs

In order to get maximum benefits from the Vaisala SiteConnect™ agreement we recommend that you complement the agreement with other Vaisala service modules and customize a total service package that best fits your needs.

In case of a system alarm Vaisala Repair Service, when included in the agreement, can be started remotely and immediately. Sometimes remote actions may solve the problem and in some cases onsite repair may be needed.

Express spare part delivery service ensures higher uptime through minimizing waiting time for spare parts. And extended warranty protects your operations from unexpected spare part costs.

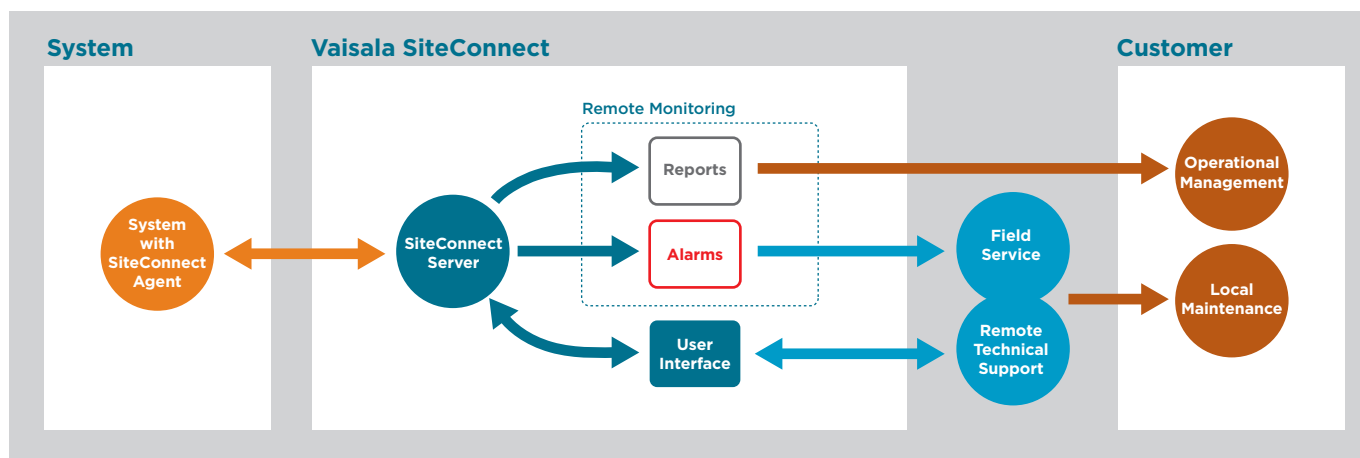

Preventive maintenance increases the availability and accuracy of your observation data by minimizing breakdowns and repairs.

Recommended add-on services

- Preventive maintenance
- Express spare part delivery
- Extended warranty
- Repair service
