

AviMet 10 in 10

The future of airport weather,
distilled into 10 essentials

MODERN WEB-BASED INTERFACE

Access the browser-based user interface from anywhere – no dedicated workstations needed.

CUSTOMIZABLE DASHBOARDS

Easily drag-and-drop the fully customizable UI, tailored for different user roles and operational needs.

ENHANCED SITUATIONAL AWARENESS

Get unmatched situational awareness for air traffic controllers, meteorologists and airport operations staff.

REAL-TIME SEVERITY INDICATORS

Take immediate action during critical weather events from built-in severity indicators and audiovisual alerts.

UNIFIED OBSERVING AND REPORTING

Streamline your workflows: Users can enter, validate and issue reports from a single interface.

ADVANCED MULTI-SENSOR ALGORITHMS

Get highly accurate, real-time weather reporting with data combined from multiple weather sensors.

SCALABLE AND CONFIGURABLE

Just right for your airport: Supports any airport size, climate or geography, serving over 2,500 systems worldwide.

EASY DEPLOYMENT & LOW IT OVERHEAD

Save time and headaches with minimal IT infrastructure plus easy deployment and maintenance.

ICAO AND WMO COMPLIANCE

Ensure regulatory alignment and future readiness, thanks to full compliance with international standards.

OPERATE WITH CONFIDENCE

Backed by our 50-year aviation legacy and a global footprint in more than 170 countries, trusted by airports worldwide.
