DL4000 Universal Data Logger

**Features**

- 10-year battery and large onboard memory
- Single and multi-channel models with up to four input channels
- Easily set scaling and measurement units for recording
- Time-based digital recording in a range of sample intervals
- Multiple connectivity options - USB, Ethernet, WiFi
- Optional vNet cradle for Ethernet or Power over Ethernet connectivity
- Traceable to SI units through national metrology institutes.
- Two year limited warranty

DL4000 series of data loggers are designed to interface with a wide range of transducers, transmitters, and sensors with a DC voltage or 0 - 20 mA current loop output.

DL4000 is a simple solution for recording and monitoring pressure, flow, fluid level, PH, electrical properties, moisture and gas concentrations. Ideal for use in standalone or networked applications, the DL4000 Universal Input logger connects directly to a PC with USB or installs to an existing network via Ethernet, Power over Ethernet or WiFi. Each logger contains a 10-year battery and onboard memory for recording a wide range of variables at the point of measurement. With autonomous power and recording capacity, data is immune to network and power interruptions.

The DL4000 data loggers can be used with Vaisala software, either viewLinc or vLog, to download, display, and analyze environmental data. The viewLinc monitoring system provides 24/7 multi-stage alarm notification, remote, real-time monitoring and gap-free data. The vLog software is a simple solution for validation/mapping applications. The DL4000 data loggers include calibrations traceable to SI units through national metrology institutes.¹

All reports are customizable and can be exported to spreadsheets and PDF to provide records that meet the requirements of 21 CFR Part 11 and Annex 11.

Choose the DL4000 VL series data logger for GxP-compliant environments and the DL4000 SP series for non-GxP applications.

¹ Measurement results are traceable to the international system of units (SI) through national metrology institutes (NIST USA, MIKES Finland, or equivalent) or ISO/IEC 17025 accredited calibration laboratories.
### Technical Data

#### General

Operating range: -40 ... +85 °C (-40 ... +185 °F) and 0 ... 100 %RH (non-condensing)

**Interfaces**
- RS-232 serial
- USB
- Wifi module
- Ethernet and Power over Ethernet (vNet)

**Weight**
76 g (2.7 oz)

**Size**
85 × 59 × 26 mm (3.4 × 2.3 × 1 in)

**Mounting**
3M Dual Lock™ fasteners

**PC software**
- Graphing & Reporting Software
- vLog SP for SP-series
- vLog VL for VL-series
- viewLinc for continuous monitoring & alarming
- OPC Server to add on to existing OPC compatible monitoring systems

**Internal clock**
Accuracy ±1 min/month at -25 ... +70 °C (-13 ... +158 °F)

**Electromagnetic compatibility**
- FCC Part 15 and CE
- EN 50581:2012
- EN 55032:2012/AC:2013 Class B
- EN 61326-1:2013

**RoHS compliance**
2011/65/EU

**Power source**
Internal 10-year lithium battery (Battery life specified with sample interval of 1 min or longer)

#### Recording Span

**Number of Channels**

<table>
<thead>
<tr>
<th>Sample Interval</th>
