

Extended Warranty for Instruments

Additional years of trouble-free operation

An extended warranty adds protection to the life of your instrument - additional years of coverage to the factory warranty provided by Vaisala.

Extended Warranty is Available Along With the Instrument Purchase

It extends the coverage of the factory warranty over the extended period of your choice, up to 5 additional years.

The Extended Warranty for Instruments offers you free shipping to the nearest Vaisala service center, using a Vaisala-specified carrier, making sure you get the service with no additional expense.

Remember Regular Calibration and Maintenance

Even the best high-performance measurement instruments require regular calibration and maintenance to ensure they continue providing the most accurate data possible. Our global service centers provide a wide range of calibration services to meet your specific needs: standard calibration, custom points, and accredited calibration services audited by the world's leading accreditation authorities.
