HMT330 Series Humidity and Temperature Transmitters
For Demanding Humidity Measurement

Features

- Full 0 ... 100 %RH measurement, temperature range up to +180 °C (+356 °F) depending on model
- Pressure tolerance up to 100 bar depending on model
- 4th generation Vaisala HUMICAP® sensor for superior accuracy and stability
- Corrosion-resistant IP65/IP66 housing
- Excellent performance in harsh conditions; good chemical tolerance
- Traceable calibration for measurement and analog outputs (certificates included)
- 10-year warranty when annually calibrated at the Vaisala Service Center

Vaisala HMT330 Series HUMICAP® Humidity and Temperature Transmitters are designed for demanding industrial applications where stable measurements and extensive customization are essential. With multiple options to choose from, the instrument can be tailored to meet the specific needs of each individual application and is pre-configured for each delivery.

Proven Vaisala HUMICAP Performance

The HMT330 series incorporates Vaisala’s 40 years of experience in industrial humidity measurement. The updated fourth-generation HUMICAP® sensor provides accurate and stable measurement even in environments with high humidity or chemical contaminants.

Wide Range of Installation Options

The wide variety of measurement probes, several installation accessories, and universal mains and DC power options make the instruments easy to install in various locations and kinds of environment; walls, poles, pipelines, and ducts, for example. The input/output cable can be fed through the back of the transmitter, which is a useful feature, especially for cleanroom installations. The HMT330 series includes six models:

- HMT331 for wall-mounted applications
- HMT333 for ducts and tight spaces
- HMT334 for high-pressure and vacuum applications
- HMT335 for high-temperature applications
- HMT337 for high-humidity applications
- HMT338 for pressurized pipelines

With multiple options to choose from, including local display, the HMT330 series can be tailored to meet the specific needs of each individual application and is preconfigured for each delivery. Also the HUMICAP® sensor itself can be selected according to specific measurement application needs.

Connectivity

- RS-232/485/422 LAN
- Modbus protocol support (RTU/TCP)
- Optional graphical display and keypad for convenient operation
- Multilingual user interface
- Compatible with Vaisala viewLinc software
HMT330 Series Humidity and Temperature Transmitters

**Graphical Display of Measurement Data and Trends for Convenient Operation**

The HMT330 series features an optional numerical and graphical display with a multilingual menu and keypad. It allows users to easily monitor operational data, measurement trends, and access measurement history of up to 4 years.

![Graphical Display](image)

The display shows measurement trends and over four years of real-time measurement history. The display alarm allows any measured parameter to be tracked, with freely configurable low and high limits.

**Versatile Outputs and Data Collection**

The HMT330 can support up to three analog outputs; an isolated galvanic power supply and up to four relay outputs are also available.

For serial interface, the USB service cable, RS-232, and RS-485/422 can be used.

HMT330 is also capable of applying the Modbus communication protocol and, together with an appropriate connection option, provides either Modbus RTU (RS-485) or Modbus TCP/IP (Ethernet) communication.

The data logger, with real-time clock and battery backup, guarantees reliable logging of measurement data for over four years. The recorded data can be viewed on the local display or transferred to a PC with Microsoft Windows® software. The transmitter can also be connected to a network with an optional LAN interface, which enables an Ethernet connection. A USB service cable makes it easy to connect the HMT330 to a PC via the service port.

**Flexible Calibration**

HMT330 instruments are calibrated at five humidity points at the factory and come with a calibration certificate that meets all the relevant traceability and compliance requirements.

A quick, one-point field calibration can be performed with the handheld HM70 meter. A two-point field calibration can be performed, for example, with the HMK15 salt bath calibrator in a controlled environment. The transmitter can also be sent to Vaisala for recalibration, and accredited ISO/IEC17025 calibrations and special calibrations are available.

Handheld Humidity and Temperature Meter HM70 is ideal for field checking HMT330 transmitters.

**Chemical Purge Minimizes Effects of Contaminant**

In environments with high concentrations of chemicals and cleaning agents, the chemical purge option helps to maintain measurement accuracy between calibration intervals.

The chemical purge involves heating the sensor to remove harmful chemicals. The function can be initiated manually or programmed to occur at set intervals.

Handheld Humidity and Temperature Meter HM70 is ideal for field checking HMT330 transmitters.

**Temperature**

**Accuracy at +20 °C (+68 °F)** ±0.2 °C (±0.36 °F)

**Temperature sensor**

PT100 RTD Class F0.1 IEC 60751

**Other Available Variables**

Dew point temperature, mixing ratio, absolute humidity, wet bulb temperature, enthalpy, water vapor pressure

1) Including non-linearity, hysteresis, and repeatability.

2) With HUMICAPâ®180CVC sensor, accuracy is not specified below −20 °C (−4 °F) operating temperature.

3) Defined as ±2 standard deviation limits. Small variations possible; see also calibration certificate.

Mechanical Specifications

**Cable bushing**

M20 × 1.5 for cable diameter

8 ... 11 mm (0.31 ... 0.43 in)

**Conduit fitting**

1/2” NPT

**User cable connector (optional)**

Option 1

M2 B-pin male
Female plug with 5 m (16.4 ft) black cable

Option 2

Female plug with screw terminals

**Housing material**

G-AlSi 10 Mg (DIN725)

**IP rating**

IP66
IP65 (NEMA4X) with local display

**Weight**

1.0 ... 3.0 kg (2.2 ... 6.6 lb) depending on selected model and options

**Standard probe cable lengths**

2 m, 5 m, or 10 m (6.6 ft, 16 ft, or 33 ft)

(Additional lengths available, see order forms for details)

**Probe Cable Diameter**

HMT333 (+80 °C (+176 °F))

6.0 mm (0.24 in)

Other probes

5.5 mm (0.22 in)

**Dimensions in mm (inches)**

**EMC compliance**

EN61326-1, Industrial Environment
Note: Transmitter with display test impedance of 40 Ω is used in IEC61000-4-5 (Surge immunity)
**Inputs and Outputs**

**Operating Voltage** 10 … 35 VDC, 24 VAC ±20%

With optional power supply module 100 … 240 VAC, 50/60 Hz

**Power Consumption at +20 °C (U\textsubscript{in} 24 VDC)**

- RS-232: Max. 25 mA
- U\textsubscript{out} = 2 × 0 … 1 V/0 … 5 V/0 … 10 V: Max. 25 mA
- I\textsubscript{out} = 2 × 0 … 20 mA: Max. 60 mA
- Display and backlight: + 20 mA
- During chemical purge: Max. 110 mA
- During probe heating (HMT337): + 120 mA

**Analog Outputs (2 Standard, 3rd Optional)**

- Current output: 0 … 20 mA, 4 … 20 mA
- Voltage output: 0 … 1 V, 0 … 5 V, 0 … 10 V
- Accuracy of analog outputs at +20 °C: ±0.05% full scale
- Temperature dependence of the analog outputs: ±0.005%/°C full scale

**External loads:**

- Current outputs: R<sub>L</sub> < 500 Ω
- 0 … 1 V output: R<sub>L</sub> > 2 kΩ
- 0 … 5 V and 0 … 10 V outputs: R<sub>L</sub> > 10 kΩ

**Max. Wire Size**

- 0.5 mm<sup>2</sup> (AWG 20)
- Stranded wires recommended

**Digital Outputs**

- RS-232, RS-485 (optional)

**Protocols**

- ASCII commands, Modbus RTU

**Service Connection**

- RS-232, USB

**Relay Outputs (Optional)**

- 0.5 A, 250 VAC

**Ethernet Interface (Optional)**

- Supported standards: 10BASE-T, 100BASE-TX
- Connector: 8P8C (RJ45)
- IPv4 address assignment: DHCP (automatic), static
- Protocols: Telnet, Modbus TCP/IP

**Optional Data Logger with Real-Time Clock**

- Logged parameters: Max. four with trend/min./max. values
- Logging interval: 10 seconds (fixed)
- Max. logging period with max. temporal resolution: 4 years, 5 months
- Logged points: 13.7 million points per parameter
- Battery lifetime: Min. 5 years
- Display: LCD with backlight, graphical trend display of any parameter

**Menu Languages**

- English, Chinese, Finnish, French, German, Japanese, Russian, Spanish, Swedish

---

**Mounting Options**

- Mounting with Wall Mounting Kit (not mandatory for wall installations)
- Mounting with DIN Rail Installation Kit

- Pole Installation with Installation Kit for Pole or Pipeline
- Mounting Rain Shield with Installation Kit

Vaisala Meteorological Installation Kit HMT330MIK enables HMT337 to be installed outdoors to obtain reliable measurements for meteorological purposes.
HMT331 for Wall Mounting

Typical Applications
- Cleanrooms
- Pharmaceutical processes
- Indoor swimming pools
- Data centers
- Archives

Vaisala HUMICAP® Humidity and Temperature Transmitter
HMT331 is a high-quality wall-mounted transmitter for demanding HVAC and condition-monitoring applications.

Technical Data
Temperature measurement range: -40 ... +60 °C (-40 ... +140 °F)

Accessories
- USB service port cable with PC software: 219916
- Connection cable for HM70: 211339
- Wall-mounting plate (plastic): 214829
- Pole installation kit with rain shield: 215109
- DIN rail installation set: 215094
- PPS plastic grid filter with stainless steel net: DRW010281SP
- Stainless steel sintered filter: HM472805P

Dimensions in mm (inches)
HMT333 with Short Probe for Confined Spaces and Ducts

Vaisala HUMICAP® Humidity and Temperature Transmitter HMT333 is a versatile instrument for applications where a small remote probe is needed, for example in demanding HVAC applications. Its small thermal mass enables rapid response to temperature changes.

**Flexible Installation**

To install the probe in ducts, channels, and through walls, an installation kit is available with a stainless steel flange, lead-through piece, and steel support bar.

HMT333 has two probe cable options – a flexible rubber cable that withstands temperatures of up to +80 °C (+176 °F), and a durable FEP cable that withstands temperatures of up to +120 °C (+248 °F). Both cable options are available in lengths of 2, 5, and 10 meters (6.6, 16, and 33 ft). Additionally, flexible rubber cable (+80 °C (+176 °F)) is available in 20-meter (66 ft) lengths.

For outdoor environments, the DTR502B solar radiation shield provides protection for the probe. The shield can be installed on a pole, beam, or flat surface.

**Technical Data**

- **Temperature measurement range**
  - -40 ... +80 °C (-40 ... +176 °F) or
  - -40 ... +120 °C (-40 ... +248 °F)

**Accessories**

- Duct installation kit: 210697
- Cable gland with split seal: HMP247CG
- USB service port cable with PC software: 219916
- Connection cable for HM70: 211339
- Wall-mounting plate (plastic): 214829
- Pole installation kit with rain shield: 215109
- Solar radiation shield: DTR502B
- DIN rail installation set: 215094
- PPS plastic grid filter with stainless steel net: DRW010281SP
- PPS plastic grid filter: DRW010276SP
- Stainless steel sintered filter: HM47280SP

HMT334 with Threaded Connection for High Pressure, Vacuum, and/or High Temperatures

**Typical Applications**
- Test chambers
- High-pressure and vacuum processes

Vaisala HUMICAP® Humidity and Temperature Transmitter
HMT334 is designed for humidity measurement in pressurized spaces or vacuum chambers.
Every probe is tested for gas and vacuum-tight installation.

Dimensions in mm (inches)
HMT335 with Long Probe for High Temperatures

Typical Applications
- Hot drying processes
- Food processes, for example baking ovens

Robust Probe Ideal for High Flow Rates
Vaisala HUMICAP® Humidity and Temperature Transmitter HMT335 has a long stainless steel probe designed for high temperatures.

With high tolerance for mechanical stress and high flow rates, HMT335 is ideal for duct measurements. The stainless steel installation flange allows easy adjustment of the probe’s installation depth. Long, robust probe allows easy installation through insulation in ovens and similar applications.

Technical Data

- Temperature measurement range: -70 ... +180 °C (-94 ... +356 °F)

Installation flange dimensions in mm (inches)

Accessories

- Mounting flange: 210696
- USB service port cable with PC software: 219916
- Connection cable for HMT70: 211339
- Wall-mounting plate (plastic): 214829
- Pole installation kit with rain shield: 215109
- DIN rail installation set: 215094
- PPS plastic grid filter with stainless steel net: DRW010281SP
- PPS plastic grid filter: DRW010276SP
- Stainless steel sintered filter: HM47280SP
- Stainless steel grid filter: HM47453SP

Dimensions in mm (inches)
HMT337 with Short Probe for High Humidity and/or Temperature

**Typical Applications**
- Professional meteorology
- Intake air monitoring of engines and gas turbines
- Timber drying kilns

**HMT337 Configurations**
Vaisala HUMICAP® Humidity and Temperature Transmitter HMT337 is ideal for the most demanding process and meteorological measurements in high-humidity condensing environments.

HMT337 is delivered in one of three configurations:
1. Basic HMT337, with a non-warmed probe for applications where humidity levels are not constantly near condensation
2. HMT337 with a warmed probe, for dew point temperature measurement under constant near-condensing conditions
3. HMT337 with a warmed probe and an additional temperature sensor, for relative humidity measurement under constant near-condensing conditions

**True Humidity Readings in Condensation Conditions**
Vaisala’s unique warmed probe provides fast and reliable measurement in environments where humidity is near saturation. The heating prevents condensation from forming on the sensor.

As the probe is heated, the relative humidity level inside it stays below the ambient level. With accurate temperature measurement, the ambient dew point temperature can be calculated precisely.

If the relative humidity value is needed, an optional temperature sensor is used (configuration option 3). The measured ambient temperature provides the compensation for calculating relative humidity and other temperature-dependent humidity parameters.

**Installation Options**
A pressure and vapor tight installation up to 10 bars through a process wall can be achieved by sealing with Swagelok® fittings from the probe, or sealing from the cable with a gland. The optional HMT330MIK Installation Kit is available for outdoor installations; duct installation kits are also available.

**Technical Data**
- Temperature measurement range: -70 ... +180 °C (-94 ... +356 °F)

**Accessories**
- Cable gland for probe cable: HMP247CG
- Duct installation kit (RH probe): 210697
- Duct installation kit (T probe): 215003
- Swagelok fittings (NPT and ISO) for both RH and T probes (up to 10 bar)
- Solar radiation shield: DTR502B
- Meteorological installation kit: HMT330MIK
- USB service port cable with PC software: 219916
- Connection cable for HM70: 211339
- Wall-mounting plate (plastic): 214829
- Pole installation kit with rain shield: 215109
- DIN rail installation set: 215094
- Warmed probe accessory: HMT330WPA
- PPS plastic grid filter with stainless steel net: DRW010281SP
- PPS plastic grid filter: DRW010276SP
- Stainless steel sintered filter: HM47280SP
- Stainless steel grid filter: HM47453SP

For more installation accessories, check the order form.

1) For an image of the duct installation kit, see HMT333 page.
HMT338 with Adjustable Insertion Depth for High Pressure, Vacuum, and/or High Temperatures

Insert or Remove the Probe while the Process is Running
With “hot tapping”, the probe is inserted directly into the process while it is running, without the need for venting or lowering the process pressure. The probe is tightened to a ball-valve assembly fixed to the process pipe or wall. The adjustable hex nut is hand-tightened to hold the probe in place temporarily.

The probe is then pushed down to the appropriate depth. The hex nut is then tightened with a wrench to lock the probe in place. Hot tapping is possible in pressures up to 10 bar.
