Vaisala HMT330 Series HUMICAP® Humidity and Temperature Transmitters are designed for demanding industrial applications where stable measurements and extensive customization are essential. With multiple options to choose from, the instrument can be tailored to meet the specific needs of each individual application and is pre-configured for each delivery.

Proven Vaisala HUMICAP Performance

The HMT330 series incorporates Vaisala’s 40 years of experience in industrial humidity measurement. The updated fourth-generation HUMICAP® sensor provides accurate and stable measurement even in environments with high humidity or chemical contaminants.

Wide Range of Installation Options

The wide variety of measurement probes, several installation accessories, and universal mains and DC power options make the instruments easy to install in various locations and kinds of environment; walls, poles, pipelines, and ducts, for example. The input/output cable can be fed through the back of the transmitter, which is a useful feature, especially for cleanroom installations.

The HMT330 series includes six models:

- HMT331 for wall-mounted applications
- HMT333 for ducts and tight spaces
- HMT334 for high-pressure and vacuum applications
- HMT335 for high-temperature applications
- HMT337 for high-humidity applications
- HMT338 for pressurized pipelines

With multiple options to choose from, including local display, the HMT330 series can be tailored to meet the specific needs of each individual application and is pre-configured for each delivery. Also the HUMICAP® sensor itself can be selected according to specific measurement application needs.

Features

- Full 0 ... 100 %RH measurement, temperature range up to +180 °C (+356 °F) depending on model
- Pressure tolerance up to 100 bar depending on model
- 4th generation Vaisala HUMICAP® sensor for superior accuracy and stability
- Corrosion-resistant IP65/IP66 housing
- Excellent performance in harsh conditions; good chemical tolerance
- Traceable calibration for measurement and analog outputs (certificates included)
- 10-year warranty when annually calibrated at the Vaisala Service Center

Connectivity

- RS-232/485/422 LAN
- Modbus protocol support (RTU/TCP)
- Optional graphical display and keypad for convenient operation
- Multilingual user interface
- Compatible with Vaisala viewLinc software
Graphical Display of Measurement Data and Trends for Convenient Operation
The HMT330 series features an optional numerical and graphical display with a multilingual menu and keypad. It allows users to easily monitor operational data, measurement trends, and access measurement history of up to 4 years.

The display shows measurement trends and over four years of real-time measurement history.

The display alarm allows any measured parameter to be tracked, with freely configurable low and high limits.

Versatile Outputs and Data Collection
The HMT330 can support up to three analog outputs; an isolated galvanic power supply and up to four relay outputs are also available.

For serial interface the USB service cable, RS-232, and RS-485/422 can be used. HMT330 is also capable of applying the Modbus communication protocol and, together with an appropriate connection option, provides either Modbus RTU (RS-485) or Modbus TCP/IP (Ethernet) communication.

The data logger, with real-time clock and battery backup, guarantees reliable logging of measurement data for over four years. The recorded data can be viewed on the local display or transferred to a PC with Microsoft Windows® software. The transmitter can also be connected to a network with an optional LAN interface, which enables an Ethernet connection. A USB service cable makes it easy to connect the HMT330 to a PC via the service port.

Flexible Calibration
The HMT330 instruments are calibrated at five humidity points at the factory and come with a calibration certificate that meets all the relevant traceability and compliance requirements.

A quick, one-point field calibration can be performed with the handheld HM70 meter. A two-point field calibration can be performed, for example, with the HMK15 salt bath calibrator in a controlled environment. The transmitter can also be sent to Vaisala for recalibration, and accredited ISO/IEC17025 calibrations and special calibrations are available.

Chemical Purge Minimizes Effects of Contaminant
In environments with high concentrations of chemicals and cleaning agents, the chemical purge option helps to maintain measurement accuracy between calibration intervals.

The chemical purge involves heating the sensor to remove harmful chemicals. The function can be initiated manually or programmed to occur at set intervals.

**Measurement Performance**

### Relative Humidity
- **Measurement range**: 0 ... 100 %RH
- **Accuracy (including non-linearity, hysteresis, and repeatability)**
  - At +15 ... +25 °C (59 ... 77 °F)
    - ±1 %RH (0 ... 90 %)
    - ±1.7 %RH (90 ... 100 %RH)
  - At -20 ... +40 °C (-4 ... +104 °F)
    - ±(1.0 + 0.008 x reading) %RH
  - At -40 ... +180 °C (-40 ... +356 °F)
    - ±(1.5 + 0.015 x reading) %RH

**Factory calibration uncertainty**
- At +20 °C
  - ±0.6 %RH (0 ... 40 %RH)
  - ±1.0 %RH (40 ... 97 %RH)
  - (Defined as ±2 standard deviation limits. Small variations possible; see also calibration certificate.)

**Response time** (90%) at +20 °C (+68 °F) in still air / in 0.1 m/s air flow
- 8 s / 17 s with grid filter
- 20 s / 50 s with grid + steel netting filter
- 40 s / 60 s with sintered filter

### Temperature
- **Accuracy at +20 °C (+68 °F)**: ± 0.2 °C (± 0.36 °F)
- **Accuracy over temperature range** (measurement range depends on model)

**Temperature sensor**
- Pt100 RTD Class F0.1 IEC 60751

**Other Available Variables (Model-Dependent)**
- dew point temperature, mixing ratio, absolute humidity, wet bulb temperature, enthalpy, water vapor pressure

---

**Mechanical Specifications**

- **Cable bushing**: M20 x 1.5 for cable diameter
- **Conduit fitting**: 1/2" NPT
- **User cable connector (optional)**
  - option 1: M12 series 8-pin (male) female plug with 5 m (16.4 ft.) black cable
  - option 2: female plug with screw terminals
- **Probe Cable Diameter**
  - HMT333 (+80 °C): 6.0 mm
  - other probes: 5.5 mm
- **Standard probe cable lengths**: 2 m, 5 m or 10 m
  - (Additional lengths available, see order forms for details)
- **Housing material**: G-AlSi 10 Mg (DIN1725)
- **IP rating**: IP66
  - IP65 (NEMA4X) with local display
- **Dimensions in mm (inches)**
  - 183 (7.20) x 119 (4.69) x 77 (3.0)

**Operating Environment**

- **for probe**: same as measurement range
- **for transmitter body**: -40 ... +60 °C (-40 ... 140 °F)
- **with display**: 0 ... +60 °C (32 ... 140 °F)
- **Storage temperature**: -55 ... +80 °C (-67 ... 176 °F)
- **EMC compliance**: EN61326-1, Industrial Environment

Note: Transmitter with display test impedance of 40 Ω is used in IEC61000-4-5 (Surge immunity)

**Mounting Options**

- Mounting with Wall Mounting Kit (not mandatory for wall installations)
- Mounting with DIN Rail Installation Kit
- Pole Installation with Installation Kit for Pole or Pipeline
- Mounting Rain Shield with Installation Kit

Vaisala Meteorological Installation Kit HMT330MIK enables HMT337 to be installed outdoors to obtain reliable measurements for meteorological purposes.
HMT331 Humidity and Temperature Transmitter for Demanding Wall-Mounted Applications

Typical Applications
- Cleanrooms
- Pharmaceutical processes
- Swimming halls
- Data centers
- Archives

Vaisala HUMICAP® Humidity and Temperature Transmitter
HMT331 is a high-quality wall-mounted transmitter for demanding HVAC and condition-monitoring applications.

Technical Data
Temperature measurement range: -40 ... +60 °C (-40 ... +140 °F)

Accessories
- USB service port cable with PC software: 219916
- Connection cable for HM70: 211339
- Wall-mounting plate (plastic): 214829
- Pole installation kit with rain shield: 215109
- DIN rail installation set: 215094
- PPS plastic grid filter with stainless steel net: DRW010281SP
- Stainless steel sintered filter: HM47280SP

Dimensions in mm (inches):
- 183 (7.20)
- 77 (3.0)
- 241 (9.49)
- 119 (4.69)
HMT333 Humidity and Temperature Transmitter for Ducts and Tight Spaces

Vaisala HUMICAP® Humidity and Temperature Transmitter HMT333 is a versatile instrument for applications where a small remote probe is needed, for example in demanding HVAC applications. Its small thermal mass enables rapid response to temperature changes.

Flexible Installation

To install the probe in ducts, channels, and through walls, an installation kit is available with a stainless steel flange, lead-through piece, and steel support bar.

HMT333 has two probe cable options – a flexible rubber cable that withstands temperatures of up to +80 °C, and a durable FEP cable that withstands temperatures of up to +120 °C. Both cable options are available in lengths of 2, 5, and 10 meters. Additionally, flexible rubber cable (+80 °C) is available in 20-meter lengths.

For outdoor environments, the DTR502B solar radiation shield provides protection for the probe. The shield can be installed on a pole, beam, or flat surface.

Typical Applications

• Cleanrooms
• Industrial HVAC systems
• Environmental chambers
• Processes with moderate temperature and humidity

Technical Data

Temperature measurement range
-40 ... +80 °C (-40 ... +176 °F) or -40 ... +120 °C (-40 ... +248 °F)

HMT334 Humidity and Temperature Transmitter for High Pressure and Vacuum Applications

**Typical Applications**

- Test chambers
- High-pressure and vacuum processes

Vaisala HUMICAP® Humidity and Temperature Transmitter HMT334 is designed for humidity measurement in pressurized spaces or vacuum chambers.

Every probe is tested for gas and vacuum-tight installation.

HMT335 Humidity and Temperature Transmitter for High Temperatures

**Typical Applications**
- Hot drying processes
- Food processes, e.g. baking ovens

**Robust Probe Ideal for High Flow Rates**
The Vaisala HUMICAP® Humidity and Temperature Transmitter HMT335 has a long stainless steel probe designed for high temperatures.
With high tolerance for mechanical stress and high flow rates, HMT335 is ideal for duct measurements. The stainless steel installation flange allows easy adjustment of the probe's installation depth. Long, robust probe allows easy installation through insulation in ovens and similar applications.

**Technical Data**
Temperature measurement range: -70 ... +180 °C (-94 ... +356 °F)

**Accessories**
- Mounting flange 210696
- USB service port cable with PC software 219916
- Connection cable for HM70 211339
- Wall-mounting plate (plastic) 214829
- Pole installation kit with rain shield 215109
- DIN rail installation set 215094
- PPS plastic grid filter with stainless steel net DRW010281SP
- PPS plastic grid filter DRW010276SP
- Stainless steel sintered filter HM47280SP
- Stainless steel grid filter HM47453SP
HMT337 Humidity and Temperature Transmitter for High Humidity Applications

Typical Applications
- Professional meteorology
- Intake air monitoring of engines and gas turbines
- Timber drying kilns

HMT337 Configurations
Vaisala HUMICAP® Humidity and Temperature Transmitter HMT337 is ideal for the most demanding process and meteorological measurements in high-humidity condensing environments.

HMT337 is delivered in one of three configurations:
1. Basic HMT37, with a non-warmed probe for applications where humidity levels are not constantly near condensation
2. HMT337 with a warmed probe, for dew point temperature measurement under constant near-condensing conditions
3. HMT337 with a warmed probe and an additional temperature sensor, for relative humidity measurement under constant near-condensing conditions

True Humidity Readings in Condensation Conditions
Vaisala’s unique warmed probe provides fast and reliable measurement in environments where humidity is near saturation. The heating prevents condensation from forming on the sensor.

As the probe is heated, the relative humidity level inside it stays below the ambient level. With accurate temperature measurement, the ambient dew point temperature can be calculated precisely.

If the relative humidity value is needed, an optional temperature sensor is used (configuration option 3). The measured ambient temperature provides the compensation for calculating relative humidity and other temperature-dependent humidity parameters.

Installation Options
A pressure and vapor tight installation up to 10 bars through a process wall can be achieved by sealing with Swagelok® fittings from the probe, or sealing from the cable with a gland. The optional HMT330MIK Installation Kit is available for outdoor installations; duct installation kits are also available.

Technical Data
Temperature measurement range -70 ... +180 °C (-94 ... +356 °F)

Accessories
- Cable gland for probe cable: HMP247CG
- Duct installation kit (RH probe) 1: 210697
- Duct installation kit (T probe) 1: 215003
- Swagelok fittings (NPT and ISO) for both RH and T probes (up to 10 bar): DTR502B
- Solar radiation shield: DTR502B
- Meteorological installation kit: HMT330MIK
- USB service port cable with PC software: 219916
- Connection cable for HMT70: 211339
- Wall-mounting plate (plastic): 214829
- Pole installation kit with rain shield: 215109
- DIN rail installation set: 215094
- Warmed probe accessory: HMT330WPA
- PPS plastic grid filter with stainless steel net: DRW010281SP
- PPS plastic grid filter: DRW010276SP
- Stainless steel sintered filter: HM47280SP
- Stainless steel grid filter: HM47453SP

For more installation accessories, check the order form.

1) For an image of the duct installation kit, see HMT335 page.
HMT338 Humidity and Temperature Transmitter for Pressurized Pipelines

Typical Applications
- Process lines
- Environmental chambers
- Vacuum-drying processes
- Compressed air lines with refrigerant dryers

Vaisala HUMICAP® Humidity and Temperature Transmitter HMT338 is ideal for installations in pressurized processes where the probe needs to be removed while the process is running.

Insert or Remove the Probe while the Process is Running
With “hot tapping”, the probe is inserted directly into the process while it is running, without the need for venting or lowering the process pressure. The probe is tightened to a ball-valve assembly fixed to the process pipe or wall. The adjustable hex nut is hand-tightened to hold the probe in place temporarily.

The probe is then pushed down to the appropriate depth. The hex nut is then tightened with a wrench to lock the probe in place. Hot tapping is possible in pressures up to 10 bar.
