

Atlantic Hurricane Season 2025 in numbers

Here's a look at all the named storms and hurricanes that occurred in the Atlantic Ocean in 2025, and how the forecasts compare with reality.

EXPECTATIONS* VS. REALITY

Category	Named storms	Hurricanes	Major Hurricanes	Accumulated cyclone energy (ACE)
Forecast	13-19	6-10	3-5	~155
Reality	13	5	4	132.5

* National Oceanic and Atmospheric Administration and Colorado State University forecasts

HIGHLIGHTS

⚡ Fewer storms, but stronger than average

⚡ No hurricanes in the U.S., wild in the Atlantic

⚡ Mixed impacts: mid-season shifted between quiet gaps and fierce surges

⚡ Hurricane Melissa's 252 mph gust set an Atlantic wind speed record

⚡ A quiet peak season gave way to a late burst of intense storms
