Choosing Data Services for Environmental Measurement

Data

Vaisala Data Services provides collection, storage and dissemination of your weather and environmental system data. Our goal is to minimize time, maximize effectiveness, and add value to every result.

5 Areas of Data Services:

Airports

Roads

Energy

Maritime

Levels of Service

Life Science

and Other

Measurements

Vaisala provides a number of service levels - from simply collecting routine data to management of every aspect of the data collection, storage, quality, processing and delivery.

Where is My Data Stored? Vaisala has three data centers globally.

Two are located on different electrical grids in the United States in addition to one in the United Kingdom for the highest resilience.

together to offer uptime for all systems housed in these

data centers.

Our centers work

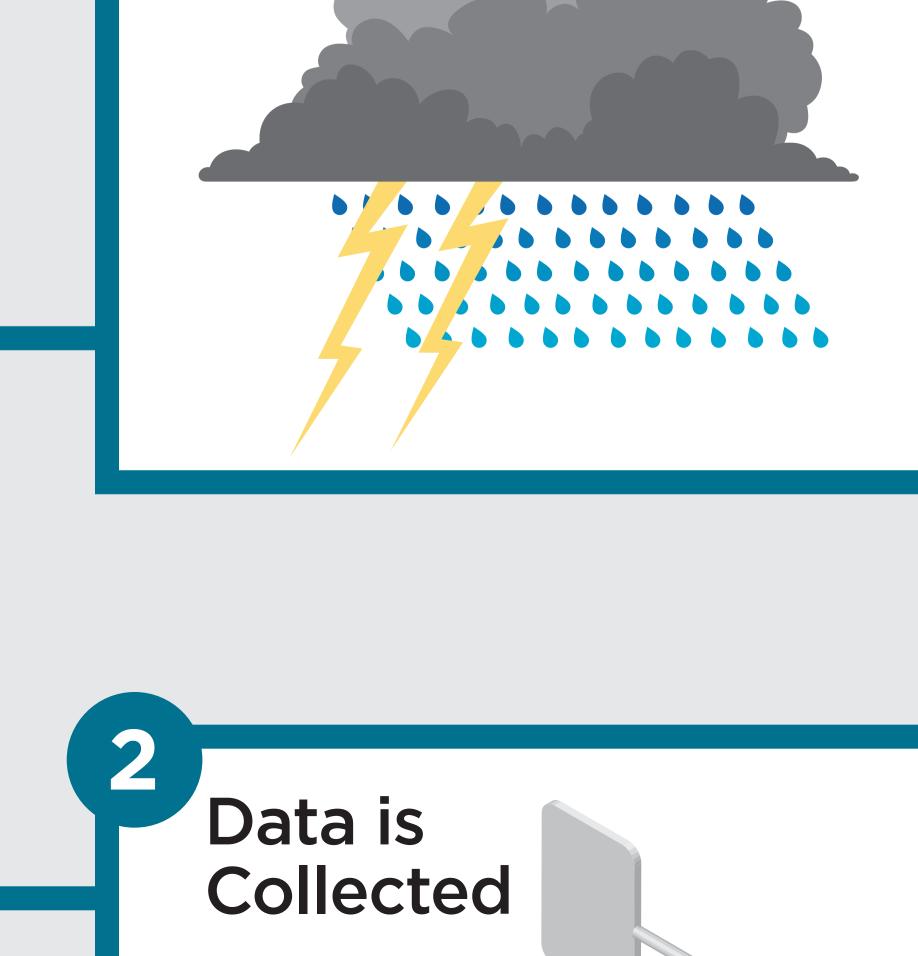

Services Vaisala also offers full monitoring services for your measurement network. This saves you

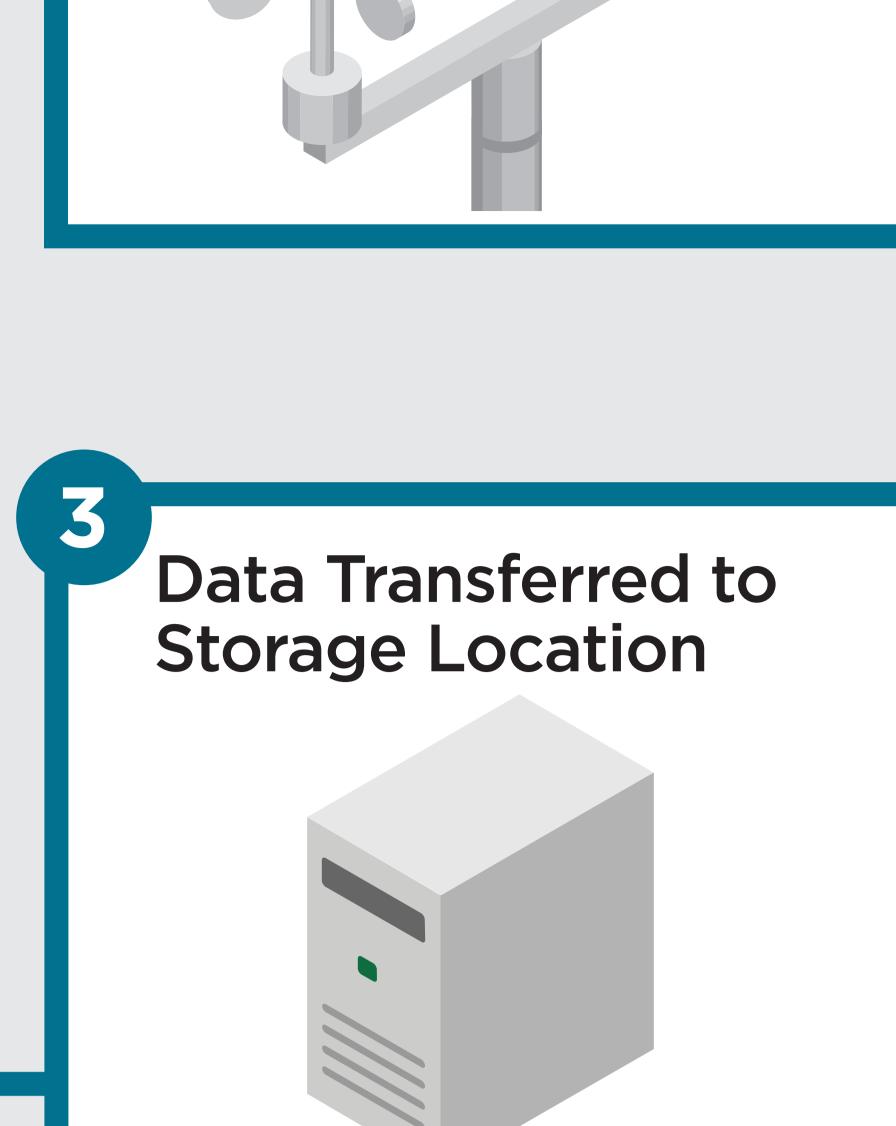

Network Monitoring

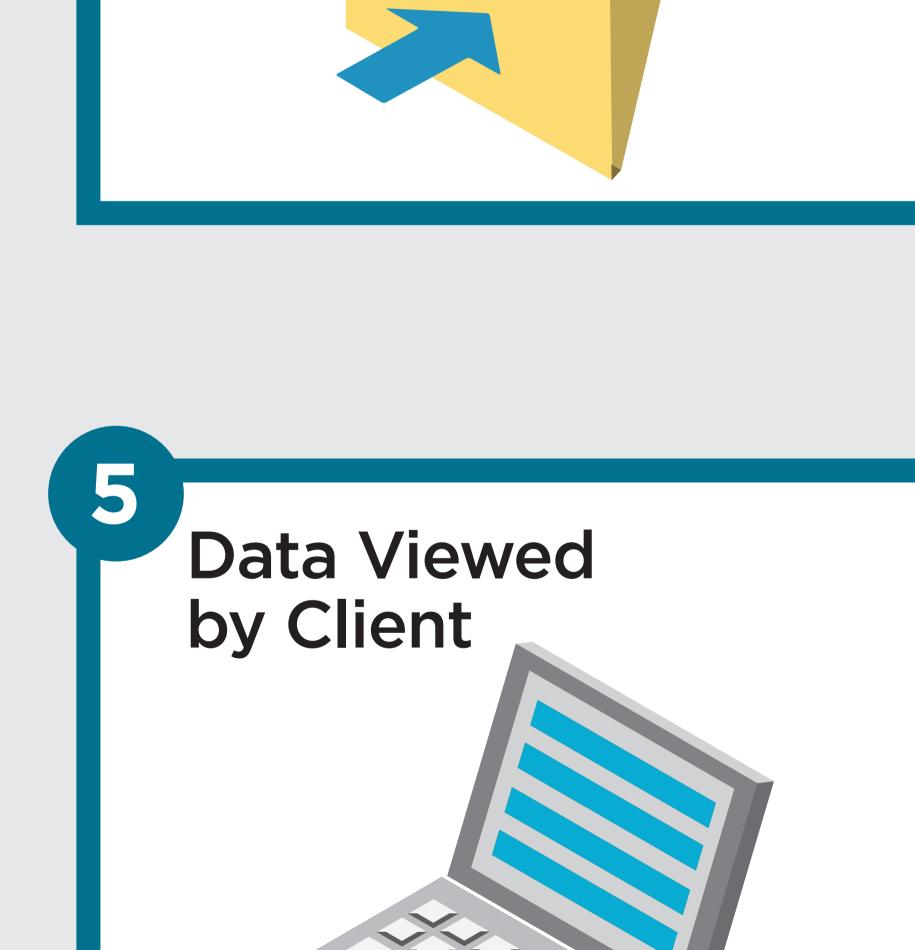

from having to build, staff and equip a network control center of your own.

Weather Happens

Specialsts Vaisala Data Services specializes in weather data in

Data

the Aviation, Road and **Energy industries.** 20+ years of data center

RHCE Certified LINUX

Systems administrators

management experience

CISCO CCISP / CCNA certified network engineers
