Vaisala STRIKE^{net}® Strike Details

- ### Features
- Objective, cost-effective, accurate lightning location results
 - Nearly 100 percent storm detection efficiency
 - Determination of the presence or absence of lightning strikes
 - Location and time-specific reports
 - Street-detail lightning location map
 - Detailed text printout of the lightning strikes
 - Confidence ellipse map to illustrate lightning strike location accuracy
 - Vaisala STRIKE^{net}® is available 24 hours a day, seven days a week, and within minutes, reports are viewable online

Vaisala STRIKE^{net}® is an online lightning location report that objectively and accurately reports individual cloud-to-ground lightning strikes at a specific location on the date of loss.

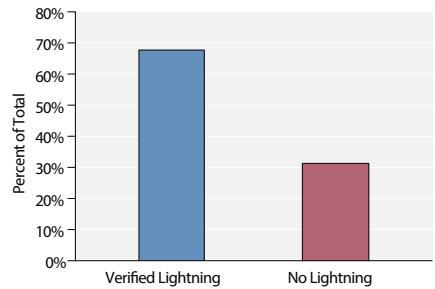

Scientifically validated, the U.S. National Lightning Detection Network® (NLDN) and the Canadian Lightning Detection Network (CLDN) provide the most accurate lightning data information available.

Vaisala STRIKE^{net}® lightning investigation tool offers the most scientific and objective solution to understand the presence or absence of lightning at a specific location, date, and time.

Vaisala STRIKE^{net}® lightning verification reports help control costs by reducing on-site inspections and streamlining the claim verification process.

Investigation methods without lightning location reports are subjective because they are too general or rely on human interpretation.

Vaisala and a Top Insurance Company's Study of 14,000 Claims

Generic weather reports or on-site physical inspection of a very complex weather event are best validated by Vaisala STRIKE^{net}®.
