

Triton Support Programs, Spare Parts Offering and Pricing – 2022

This document describes the Triton support programs and spare part offering for Triton for continuation of the product ramp down support phase through the year 2022. Pricing is effective January 1, 2022.

Triton Support Programs

January 1, 2022 – Prices are USD and both Prices and Listed Items are Subject to Change Without Notice

Overview

The Limited Support SkyServe program continues to be offered in 2022. This provides an inexpensive approach to maintaining your Triton hardware. Daily monitoring is NOT included for the Standard Triton.

The SkyServe Limited Support program includes:

- Online access to all your wind data
- Daily Back-up and Archiving of Data
- US Based Weekday, Technical support including email and phone
- Triton Observation Platform upgrades when available
- For Heater Tritons, the program includes heater burn monitoring during the winter, but other monitoring is customer's responsibility. There is no provision for running the heater system except through Vaisala.

Program Description

The SkyServe Limited Support program allows customers to monitor their fleet of Tritons and pay for field repairs as needed. Customers have the flexibility in carrying out field repairs. Either by contracting Vaisala, using their Vaisala Advanced Trained labor and parts, or using a Certified Triton Support Partner. Clients will continue to have access to Vaisala experts to help with remotely diagnosing issues with Triton hardware.

Table 1 shows the coverage details of services included in this program.

Cost

Due to general cost increases, Triton support program pricing has been adjusted for 2022.

The cost of the program is:

- Limited Support Program for Standard or Heater Tritons: \$2,300 USD.
- Optional for Heater Tritons: 24/ 7 Remote Heater Operations during winter months for an additional \$3,450 USD per year.

Vaisala shall charge for applicable state or federal/national taxes as required in addition to the pricing referenced above. If you have tax exempt status, please share that with your Vaisala representative at the time of contract signing.

Triton Reactivation Fee

- Vaisala will charge a 5,000 USD reactivation fee (Vaisala part number 950-0019 SERVICES, Triton, Reactivation Fee) when a customer wishes to reconnect one of their existing Tritons for which a support contract was previously cancelled after receiving the ramp down notification in May 2019. The Triton reactivation fee is charged to recoup the expenses associated with reactivating the data service connection for a previously decommissioned Triton.
- Tritons that have been purchased second-hand, will not be supported under the Limited Support SkyServe contract.

Triton Spare Parts End-User Price List

January 1, 2022 – Prices are USD and both Prices and Listed Items are Subject to Change Without Notice

This price list is provided as a reference for the offering Vaisala supports for Triton during the product ramp down support period until 31 December 2024. Some parts may be subject to limited availability, and once existing inventory is depleted, those parts will no longer be offered. The spare part offering pricing has been adjusted for 2022 to reflect the general cost increase and continued cost pressures brought about the effects of the Covid-19 pandemic on global supply chains.

Table 2 shows the Triton spare part offering and end-user pricing in USD (subject to change without notice).
