Vaisala Information Security Policy

Vaisala Information Security Policy

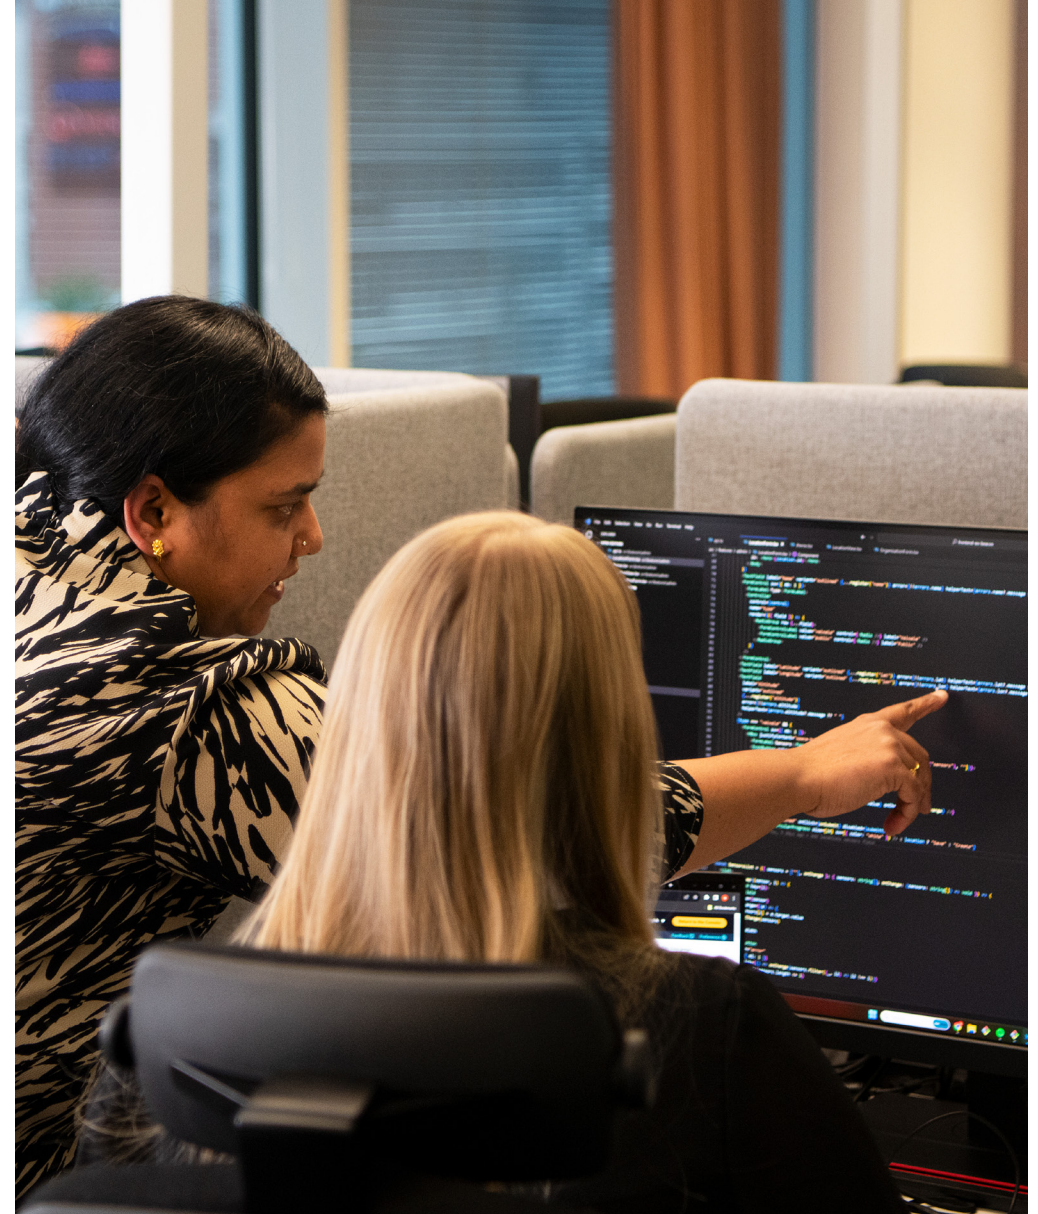

Vaisala is a global leader in measurement instruments and intelligence for climate action. We equip our customers with devices and data to improve resource efficiency, drive energy transition, and care for the safety and well-being of people and societies worldwide.

We secure the information provided by Vaisala products and services. We integrate security into our products, technologies, and processes to safeguard customer data, business partner information, and Vaisala's intellectual property. Everyone at Vaisala has a role in keeping the information secure.

We are committed to fulfilling the information security needs and expectations of our stakeholders, meeting customer requirements, and complying with all applicable regulations.

Our information security management is risk based. We manage risks using an all-hazards approach with security-aware people, clear processes, and relevant security standards, guidelines, and technologies.

At Vaisala, we are dedicated to maintaining and improving our information security management system. The Leadership Team regularly reviews information security risks, targets, and performance, ensuring sufficient resources, including people, systems, and a supportive work environment.
