

# RoadDSS™ Software Update

Engineering update  
**Tuesday 27 October, 2020**

The update includes improvements to the graph to support Flash EOL (end of life) and minor updates to RoadDSS Manager action planning.

## RoadDSS Manager | Action Plan Update

In the previous release, based on user requests we included additional fields to the action plan.

The new fields are non-mandatory, free-text form and appear in the New Action input box that can be accessed from either the Planning Overview or Route Planning Tab.

An adjustment has now been made to the Action Plan such that if none of the Plans have any data populated to the new parameters they will not be included in the emailed plan.

### All - Action Plans

| Route            | Action                      | Cause | Start Time       |
|------------------|-----------------------------|-------|------------------|
| Cimarron Hills 2 | Dry Salt 20g/m <sup>2</sup> | Ice   | 26.10.2020 22:30 |
| Cimarron Hills 3 | Dry Salt 20g/m <sup>2</sup> | Ice   | 26.10.2020 22:30 |
| Cimarron Hills 5 | Dry Salt 20g/m <sup>2</sup> | Ice   | 26.10.2020 22:30 |

In the case where any one route does have data input then that parameter column will appear for all routes and will remain blank for those routes with no input.

### All - Action Plans

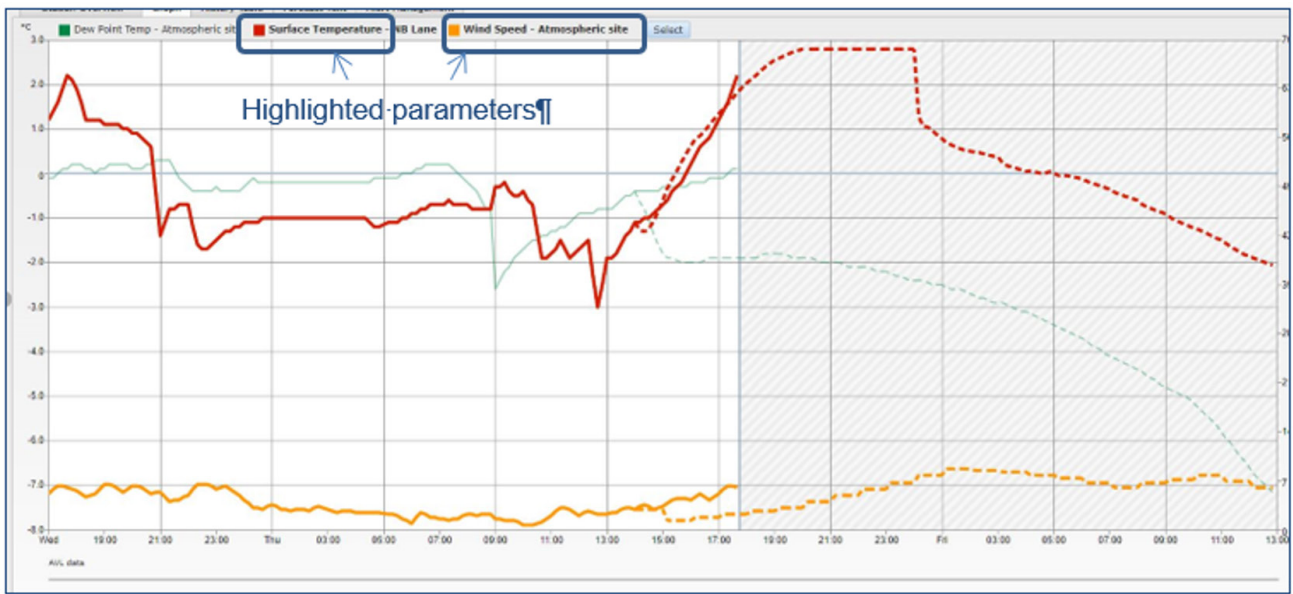

| Route            | Action                      | Cause | Start Time       | Forecast Min Road Temp | Forecast Time Crossing Zero | Forecast Time Returning Above Zero | Residual Salt | Matrix Used | Vehicle | Driver     |
|------------------|-----------------------------|-------|------------------|------------------------|-----------------------------|------------------------------------|---------------|-------------|---------|------------|
| Cimarron Hills 2 | Dry Salt 20g/m <sup>2</sup> | Ice   | 26.10.2020 22:30 |                        |                             |                                    |               |             |         |            |
| Cimarron Hills 3 | Dry Salt 20g/m <sup>2</sup> | Ice   | 26.10.2020 22:30 | -2.4                   | 27.10.2020 01:00            | 27.10.2020 03:00                   | None          | 2D          | HA60083 | Joe Driver |
| Cimarron Hills 5 | Dry Salt 20g/m <sup>2</sup> | Ice   | 26.10.2020 22:30 |                        |                             |                                    |               |             |         |            |

## Additional Support for Graphs

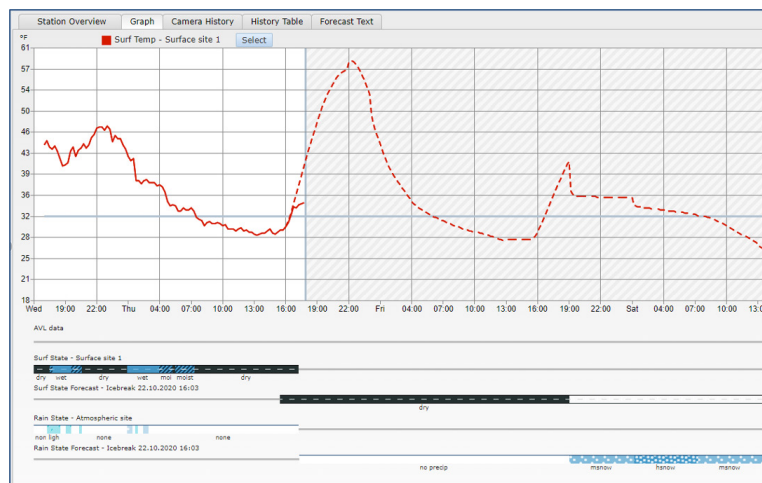

As previously communicated, end of life for Adobe Flash Player has required an alternative graph to be implemented.

To support accessibility, it is now possible to select individual parameters to be highlighted for emphasized focus.

To highlight one or more parameters select it by clicking on the legend. Both parameter name and the corresponding line on the graph are highlighted. To deselect, click the parameter name again.

**Rain State** is now selectable from the “Select” tab at the top of the graph. At least one other parameter must be selected in order for Rain State to be displayed.

The Vaisala Customer Service team is available if you have any questions about these latest improvements and can be contacted on +44 (0)121 683 1269, email [ice.technical.support@vaisala.com](mailto:ice.technical.support@vaisala.com) or call US Toll Free: 1-800-221-9779, email [icena.customer.support@vaisala.com](mailto:icena.customer.support@vaisala.com)

Alternatively, raise a service request in our My Vaisala portal <http://www.vaisala.com/en/My-Vaisala>
