RoadDSS On-Demand

REAL-TIME OBSERVATIONAL INTELLIGENCE OF YOUR ROADS!

Making decisions about winter weather does not need to be that hard!

When a winter storm is approaching, your community is counting on you and your team to perform.

You have to know how to staff during the storm & how much de-icing chemicals to use.

"We already do a good job!" - Can you prove it?

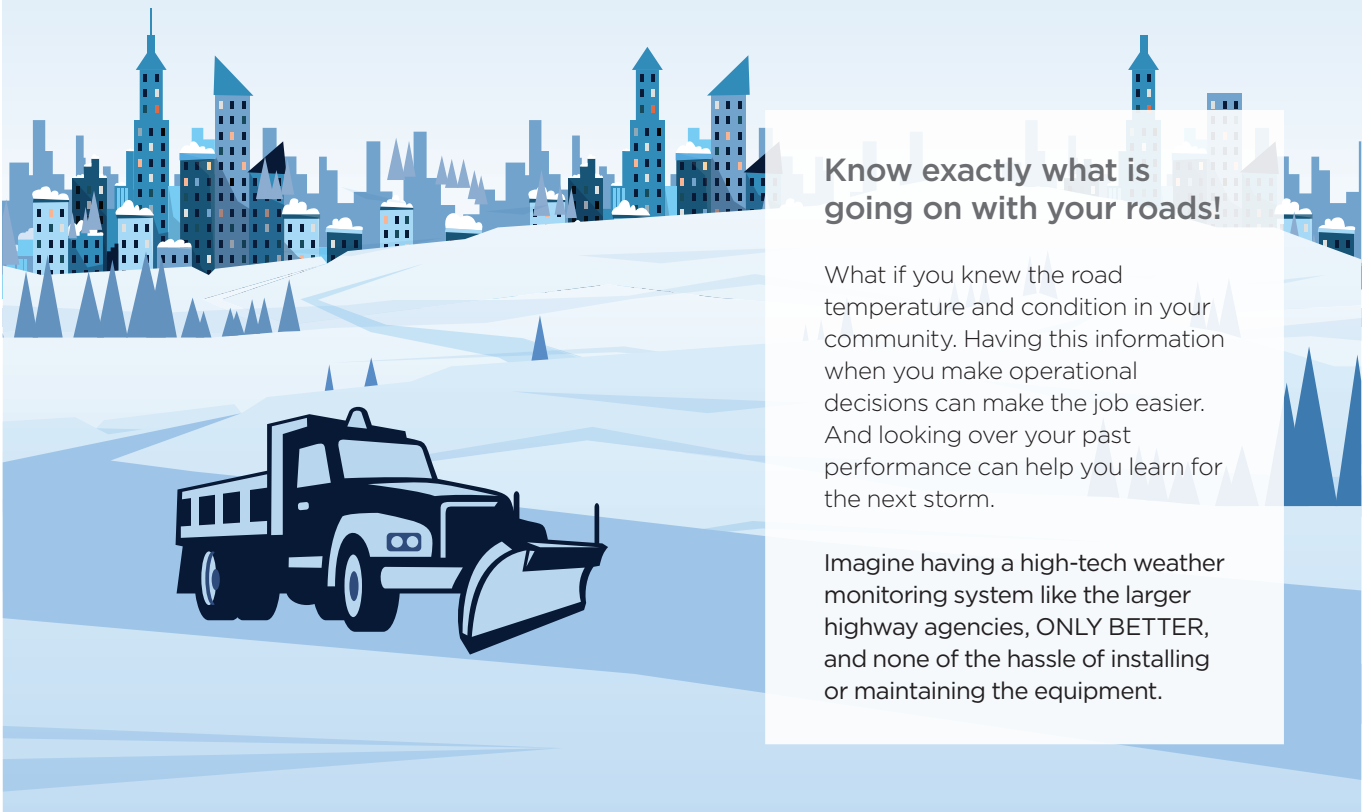

Have you ever been woken up in the middle of the night? Becoming more proactive vs. reactive can help you reduce your team's stress, make decisions easier, and stretch your operations budget further.

Know exactly what is going on with your roads!

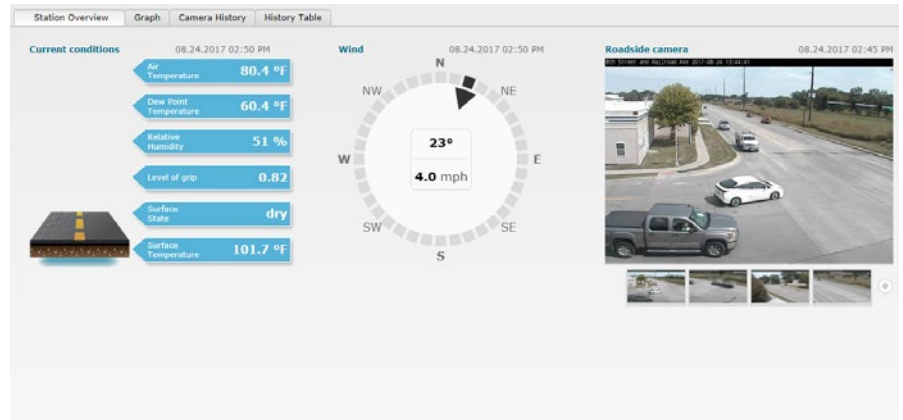

What if you knew the road temperature and condition in your community. Having this information when you make operational decisions can make the job easier. And looking over your past performance can help you learn for the next storm.

Imagine having a high-tech weather monitoring system like the larger highway agencies, ONLY BETTER, and none of the hassle of installing or maintaining the equipment.

How can Vaisala help?

RoadDSS On-Demand is a subscription-based service; there is no need for you to purchase or install equipment. Vaisala installs our state-of-the-art road weather station on your existing infrastructure, handles all servicing, and provides you access to the data through our cloud based software interface. The service also includes access to a 72-hour prediction of the road conditions, and performance index to measure your effectiveness.

View your street from Vaisala cloud based software.

Vaisala sensors monitor your roads.

RoadDSS On-Demand Includes:

View road conditions and forecast info anytime online through a secure cloud based software

Road weather station installed in a location of your choosing

Configure alerts from the software

State-of-the-art sensors

- Road temperature
- Surface friction / Surface condition
- Air temperature, wind & precipitation

Ability to evaluate your performance and see historical information of the site

Displays Radar and lightning data for year-round support

No Upfront Equipment Costs!

Vaisala retains ownership of the system and the responsibility to it, so there are no upfront equipment costs
