

VAISALA

7 reasons Mobile Detector MD30 is the industry leading road condition sensor for dynamic spreading systems

Compact, easy to install, and cost-effective even for large fleet deployment

Third-party tested, world-leading accuracy

Quick response time and high sensitivity

High-quality lasers (vs LED) offer exceptional sensitivity, even for thin layers as small as 0.01 mm

The only road surface condition sensor specifically designed for plows

Molded structure prevents water leaks

The only sensor with advanced diagnostics to ensure reliable measurements
